

● A visionary approach to clinic hysteroscopy

INTUITIVE
CONNECTION

UBIPACK

GYN

COMEG
medical technologies

• A HIGH-PERFORMANCE AND INTUITIVE SYSTEM FOR QUALITY DIAGNOSIS

Even easier to use and greater visibility

UBICAM

Ubicam is an intelligent and ergonomic camera, specially developed for diagnosis applications :

- USB 2.0 digital output,
- Diagnosis aid,
- 2 buttons to control white balance and «anti-moire» function for fibrescopes.

The **iCe**™ (Intelligent Control Endoscope) feature of the Ubicam optimises all its settings. Whatever the environment and endoscope in use, the aim is to provide you with the best possible image quality, without you ever having to intervene.

This unique feature analyses in real time :

- Size of the endoscope,
- Color temperature,
- Brightness.

SOPRO Imaging

Sopro Medical Imaging software Medical constitutes a complete database of all your patients. A wide range of ergonomic and high-performance tools, for example :

- Capture of images or video sequences,
- Photo/video annotation,
- Editing and personalization of medical reports,
- Simple and intuitive video editing,
- Audio recording,
- Data security.

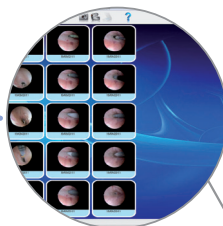

UBlight

Ublight is packed with features and has a compact and attractive design.

- Light intensity equivalent to 100 watt Xenon light source,
- LED lifespan of up to 50,000 hours,
- Reduced heat emission,
- Bright illumination in all conditions,

- Color temperature that optimises color contrast,
- User-friendly,
- Best product size vs. light intensity ratio on the market.

Ubipack GYN provides you with reliable results, optimal monitoring and better communication with your patients, thanks to the creation of personalized reports and data sharing.

UBIPACK_{GYN}

• TURNKEY SYSTEM

Cost Effective Solution

Ubipack is a complete, light and practical system perfect for use in clinic.

Thanks to its USB 2.0 output, you can connect it directly to the camera on your computer, thereby optimising the space in your clinic.

Plug & Play, Ubipack GYN is a unique, win-win solution.

Independence when carrying out procedures in your clinic and cut costs by freeing up the operating room.

• BETTER OUTCOMES FOR YOUR PATIENTS

Even greater accuracy

Hysteroscopy is a technique recognised as an effective tool to assess abnormal uterine bleeding and diagnose pathologies.

With direct visualisation of the uterine cavity, doctors are able to provide patients with direct feedback in a more relaxed environment than the operating room.

18%

of patients could have focal lesions that go undetected with a biopsy alone ^[1]

85%

greater accuracy in detecting intra-cavity abnormalities than ultrasound ^[3]

8x

better results in the detection of polyps than with a biopsy ^[2]

3x

greater chance of detecting endometrial hyperplasia than with a biopsy ^[2]

• THE STANDARD UBIPACK GYN KIT INCLUDES : Ref. S_K10_1015

Ubicam Camera + Ublight light source + 1 Sopro Medical Imaging software licence
+ 18,5 mm coupler + light cable + 2 adapters

	CAMERA Ubicam	1 CCD CAMERA
POWER CONSUMPTION	2,5VA	25VA

UBICAM

USB CCD 1/4" Camera for diagnosis aid
Ref. S_181_0011^a

Compatibility

Ubicam is compatible with all :

- Rigid endoscopes
- Flexible endoscopes
- Colposcopes*

* Equipped with a beam splitter

UBlight

LED light source for consultations
Ref. S_281_0002^a

LED Ublight light source (light output equivalent to 100 watts).
With external transformer, Storz adapter

	Ublight LIGHT SOURCE	XENON LIGHT SOURCE
POWER CONSUMPTION	30VA	350VA

SOPRO imaging

Complete imaging software developed by
doctors for patients

Ref. 505026^a

* Contact us for a MAC-compatible version

UBIPACK GYN

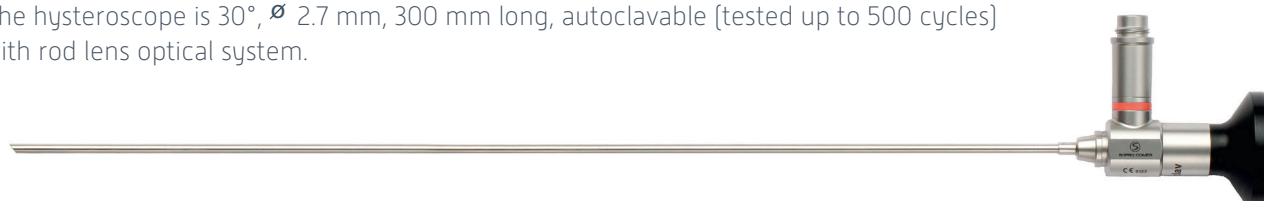

• THE **ADVANCED** UBIPACK GYN KIT INCLUDES :

Ref. S_K10_2001

The standard Ubipack GYN kit Ref. S_K10_1015

+ Hysteroscope Ref. 163 282 992^b

The hysteroscope is 30°, Ø 2.7 mm, 300 mm long, autoclavable (tested up to 500 cycles) with rod lens optical system.

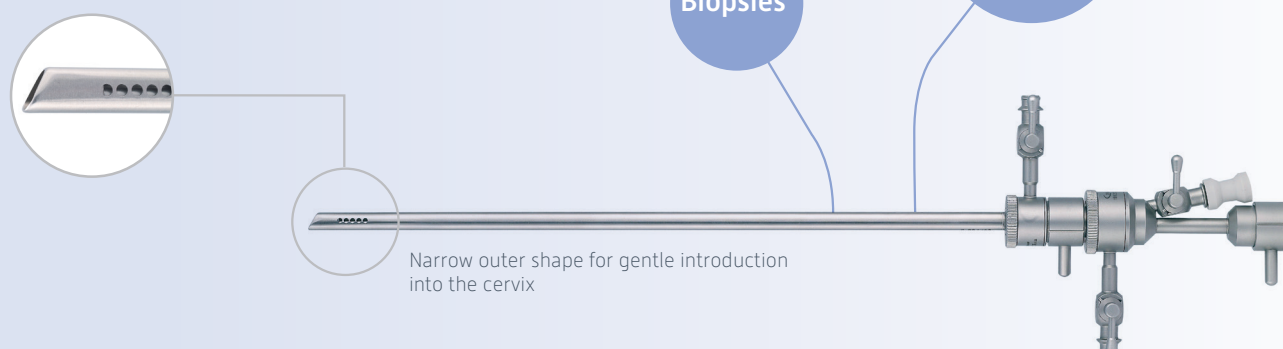

+ Diagnosis sheath Ref. 191 273 052^b

The 10.5 Fr. sheath for clinic diagnosis hysteroscopies.

INFORMATION

Complete your system with the
operative sheath Ref. 191 273 202^b

For more information, please contact the local Sales Representative.

Sopro^a et Sopro-Comeg^b are manufacturers of Class I^a and IIa^b medical devices bearing the CE marking presented in this document. TUV-SUD 0123^b certified body. These medical devices marketed by Sopro and Sopro-Comeg are not reimbursed by health insurance organisations and are destined exclusively for healthcare professionals.

Always read the instructions provided with the devices carefully before use. Document last updated: September 2016.

COMEG, YOUR PARTNER IN ENDOSCOPY

● In combination with Ubipack :

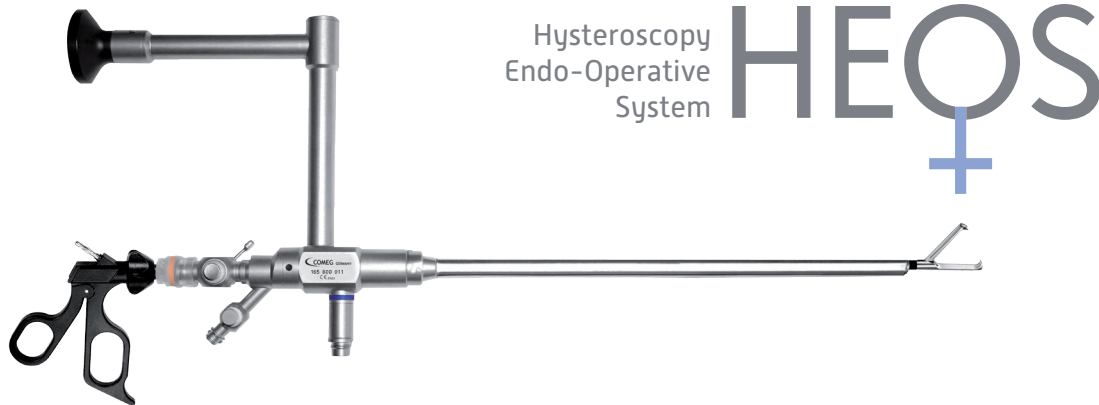

The mobile consultation cart, together with its integrated touch screen computer, will perfectly meet your needs for clinic diagnosis hysteroscopies.

For greater comfort, a medical keyboard is also available.

- Master with Sopro Imaging
Ref. S_098_0001
- Cart : **Ref. 990242**
- Azerty Keyboards : **Ref. 700695**
or Qwerty : **Ref. 700694**

● Do you know HEOS ?

Hysteroscopy
Endo-Operative
System

HEOS

+

HEOS is an operative system that uses less energy to prevent endometrial trauma.

- Standard kit : **Ref. 191 306 200**

Comeg Medical Technologies is the Medical Division of the Acteon Group.

- Over **40 years of experience** in surgical endoscopy
- Focus specifically in **Minimally Invasive Surgery (MIS)**
- **Global presence** on 6 continents
- **Meeting the specific needs** for GYN, URO, ENT, LAP and ARTHRO surgery
- **Intuitively connecting physicians** with the appropriate solutions

Comeg design intuitive solutions for minimally invasive surgery.
